PROFILE

Full-Stack Developer specializing in React, Node.js (MERN) and backend system development. Experienced in building scalable web applications, RESTful APIs, and database-driven systems.
Developed multiple end-to-end projects, including web platforms and AI-based prediction systems using real-world datasets.

WORK EXPERIENCE

Dong-A University 02/2025 - ONGOING
Researcher

- Developed ML models (XGBoost, RF, ANN, CatBoost) for structural engineering datasets ,Improved R2 and reduced overestimation.
- Published multiple journal papers in international and local journals.

Fauget Studio 10/2023 - 07/2024
Full stack developer

- Designed and developed scalable full-stack applications using React, Node.js, and Express, supporting dynamic user interactions.
- Architected and implemented RESTful APIs and backend services, enabling seamless data flow across multiple application layers
- Built and optimized database schemas using MongoDB/PostgreSQL, improving query efficiency and system performance
- Implemented secure authentication mechanisms using JWT, role-based access control, and data protection best practices
- Improved application performance through API optimization, lazy loading, and efficient state management.

QTIM 04/2022 - 05/2023
Frontend Developer

- Developed SPA applications using React, TypeScript and Redux.
- Built and maintained web applications using a combination of front-end and back-end technologies such as Node.js, and Express.
- Created and optimized database schemas, implemented data models, and wrote complex queries with MongoDB.
